I am using this feature of this website a bit askew for a good solid reason. It might be out of the box but it is definitely an unexpected move in a game where #Gangstalking is being the ploy against me. Now, you might think I am crazy..... but if you were to find the research time for yourself, understand the dimension of what is called gangstalking is real, the facts are the facts and open posting is not getting me far enough to collapse their agenda to stop harassing me. Who are they? I would like to find someone outside of me to investigate that fact and to empower law enforcement outside of me to follow the laws of our land and proceed to conduct and protect and serve what are hate crimes being targeted against me. But no one wants to get involved. I need someone to provide a safety net outside of law enforcement and go over the evidence I have found to prove they are real, which I already can prove that. Expenses paid but as far as time invested, I have a proposal for you to consider as far as the value of the exchange. Without the termination of this #Gangstalking, I do not feel safe where I live. The gang-stalking has resulted in my vehicle being stolen [ ploy of mental games; their tactics to cause my mental instability ]. 3 separate times as a result of living in 3 separate regional areas of the Ryan White Care Act funded social service agencies who are the ones targeting me. They will not stop targeting me. I need someone on the outside of this circle that will conduct an impartial overview of my writing and create something enforceable. This means the person needs to have great writing and persuasive skills as they interface to law enforcement. Also, I need the person as an assistant to the truth to understand the theory and design of my internet informational network so that we can proceed to build what is my envision an informational tool of computer-assisted conflict resolution system interface using the constructs and ideals of the African Adinkra Symbolic Communications System known as #Adinkra and particularly how to best societally issue the symbol of #Mpatapo against a party or parties when there is a conflict. The assistant will hold 49% and I will hold a 51% interest in any kind of business model that can be employed into actionable processing onto the internet to include multiple language development. This job offer is a volunteer project more of an investment to the security and safety of an idea or concept to bring into being peacebuilding by way of computer-assisted information theory technology. Can I have your attention to the details if I were to schedule a chat? There is no time limit for this job and multiple persons may fill his position that I expect will be volunteer time of no more than 10 hours or so per month if I had 5 persons working on this project. I would like to start a company once 5 persons have been reached where they will hold 49% interests in all income opportunities.

Introduction: There are conflicts in this world that are of the type called intractable. There is no forum or way to uproot these conflicts into actionable reconciliation process holding the truth at all cost to the line where there are harms being done to even deaths occurring in our world that someone need to have a forum to find where parties can discuss their conflicting ways. That forum and the digital user interface needs to be coded. But for now, these are already found in what is internet memespace under the internet domains of [ @Realuphuman.net / @Gruwup.net / @Fuckeduphuman.net ], and yes, you read that correctly. There are other in operation company names on this site with the word fuck in them. Such examples include [ Fuck Cancer, Fuck Yeah Astrophysics, Fucked Up Design ] to just name 3, My internet domains follow with the African Adinkra and there should be a way to handle the logistics to place this into a full freely accessible model where peacebuilding is the goal of all exchanges. I expect that once this is coded, business revenue will be state-granted and payouts to reconciled parties the incentive to interface. However, investor money will be 50% of grant money. So if grant money was \$1,000,000

floor opportunity salary. If only 3 associates are present, well you see the point. I am not making this binding in contract form until we can eliminate the gang stalking threat because guaranteed they will begin targeting you. [ End ] Please read my LinkedIn profile in Detail; I have the information theory model and they know it and many out here in our world would not like such a model to move into the actionable process.
